60"

## Post Tops

Pyramid

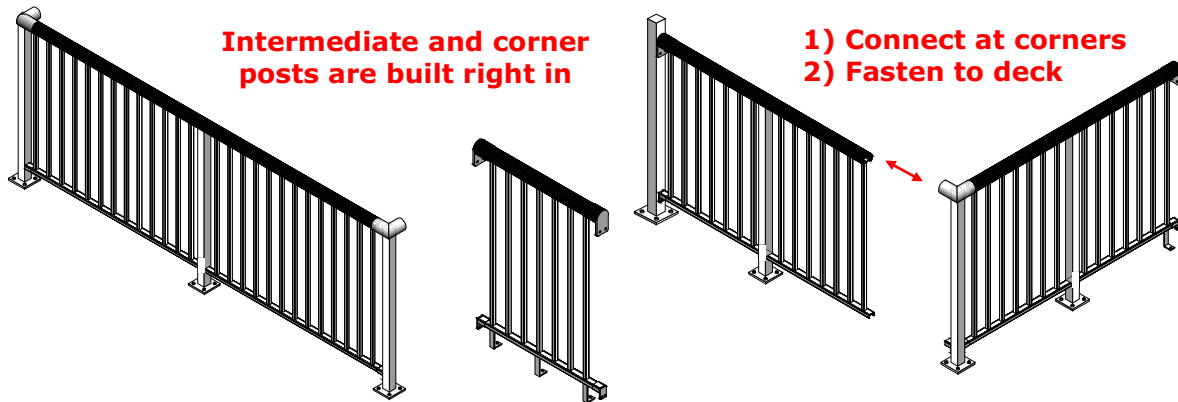

Ball Cap

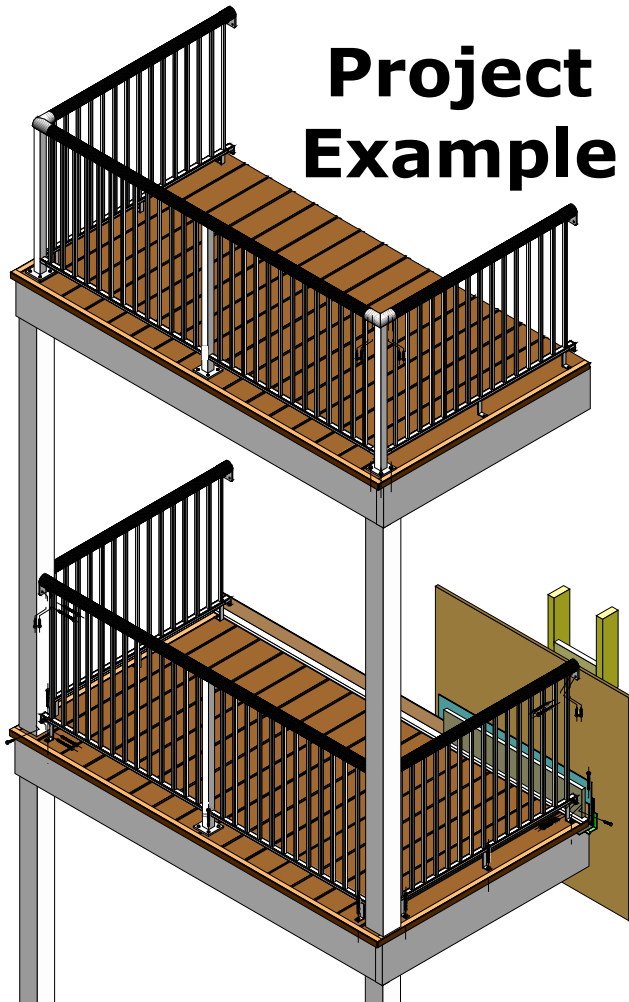

# Railing Sections

## Complete Rail Sections Ready to be Installed

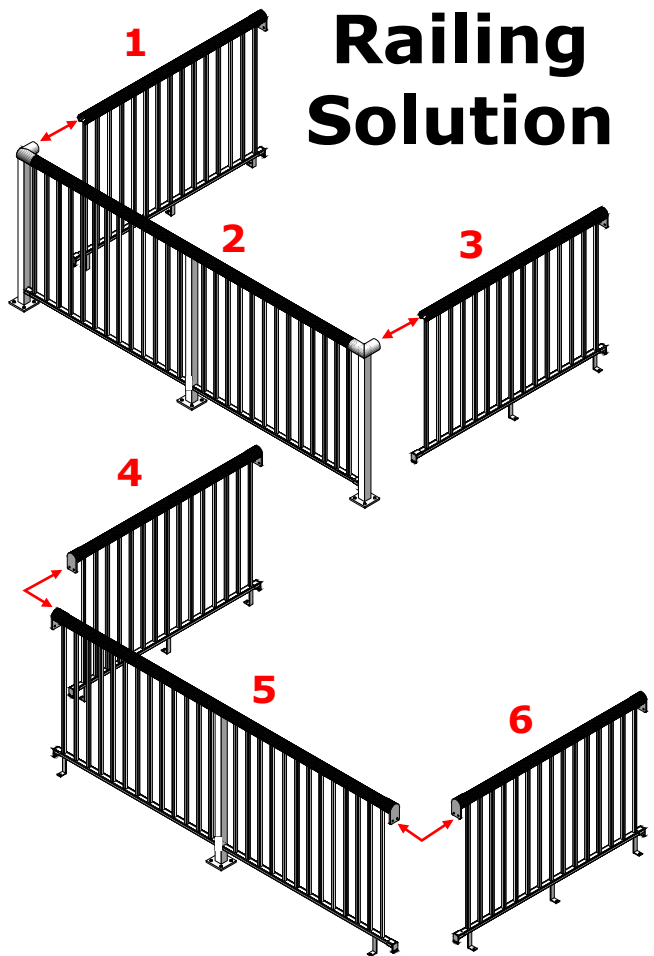

The Versadeck railing difference is simple. Our railing comes in complete sections made custom to fit your deck. You don't have to cut and piece dozens of parts together. With Versadeck, you'll get professional grade railings that fit your deck in full sections.\*

### Project Example

### Railing Solution

\*1) The longest rail we can make without a splice is 19'. In this case we build a splice in the rail and send two that fit together.

\*2) In some cases we can send a rail longer so the end post can be removed, then field cut to fit and re-installed.

\*3) Advanced installers can request rails not to be pre-fabricated when site conditions may require field assembly.

\*4) Stair railing do not come fully fabricated as they need to be field cut and assembled on site to conform to stair angle and design.

# Railing Components

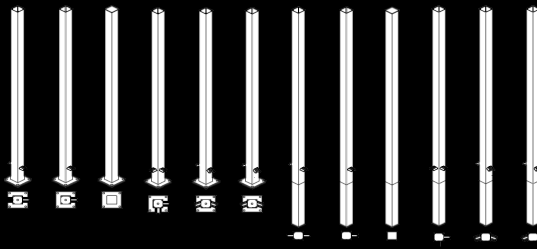

## Rail Assembly Options Conform to Any Project

Versadeck railing systems are assemble job specific. We build the rail sections here to fit your deck with the best parts. You get completed railing sections, not a pile of parts, resulting in an easy installation experience with high end professional results.
